

*Complete Range of Conduit*

# PVC PIPES & FITTINGS

**OUR PRODUCTS : PVC CONDUIT PIPES | PVC CASING & CAPPING | FLEXIBLE CONDUIT PIPES  
PVC SLIP TYPES BENDS | PVC JUNCTION BOX & FITTINGS | GI CONCEALED METAL BOXES**

## ELECTRICAL PVC CONDUIT PIPES

Electrical PVC Conduit Pipes are commonly used for protecting Electrical wiring. They are light in weight compared to G.I & Steel Pipes and so they are the cheapest option. These are manufactured using best quality raw materials by our knowledgeable professionals with the help of imported machinery and latest technology.

**RG GOLD** Electrical PVC Conduit Pipes Available Various Sizes  
19mm, 20mm, 25mm, 32mm, 40mm, 50mm & Thickness  
1.0mm, 1.2mm, 1.5mm, 1.8mm, 2.0mm

**RG** ISI Conduit Pipe are manufactured in accordance with bureau of Indian standards specifications. IS:9537 (Part-3) in range of 20mm to 50mm with light (LMS) medium (MMS) & Heavy (HMS) range.

### Available Colours :

White, Grey, Black

On Request

## PVC CASING & CAPPING

PVC Casing capping is commonly used in residential, Commercial and industrial settings where electrical installations are required. It is often used in conjunction with switches, sockets and other electrical devices to create a safe and aesthetically pleasing wiring system.

**RG GOLD** PVC Casing & Capping Available various sizes  
16mm, 20mm, 25mm, 32mm, 40mm, 50mm.

## CONDUIT PIPE FITTINGS

**RG GOLD** fittings are designed to connect and secure conduit pipes together, allowing for easy installation and maintenance of electrical systems. Available all types of conduit pipe fittings include Connectors, Couplings, Elbows, Tees, Junction boxes, deep junction boxes round and Ceiling plates.

**RG GOLD** Slip type Bends are manufactured from fully automatic Machine to ensure correct degree and shapes, available in various size & thickness.

## CORRUGATED FLEXIBLE CONDUIT PIPES

Corrugated flexible conduit pipes, also known as flexible hose pipe are a type of Conduit used for protecting ad routing electrical wires and cables. They are made of a flexible material that allows them to bend and adapt to various installation requirements. The main advantage of corrugated flexible conduit pipes is their flexibility, which enables them to navigate around obstacles, corners and tight spaces with ease. The corrugated design, featuring ridges or waves along the length of the conduit, Enhances flexibility while maintaining strength and durability. These conduits are commonly used in situations where rigid conduit installations are impractical or difficult.

**RG GOLD** corrugated flexible conduit pipes, available various sizes 10mm, 16mm, 20mm, 25mm, 32mm, 40mm, 50mm.

**Available Colors:** White, Grey, Black

## CONCEALED GI SHEET METAL BOXES

Concealed metal boxes, often referred to as GI concealed metal boxes are commonly used in electrical installations. These boxes are typically made of galvanized iron (GI) and are designed to house electrical wiring connections or devices while being hidden within walls or ceilings. They provide a secure and protected enclosure for electrical connections, helping to ensure safety and organization in electrical installation.

**Available Sizes:**

2m, 3m, 4m, 6m, 8h, 8SQ, 12M, 16M, 18 Module.

## MCB DISTRIBUTION BOARDS

MCB Distribution boards are commonly used in residential, commercial, and industrial settings to distribute electricity and safeguard electrical circuits. The specific configuration and components may vary depending on the Application and local electrical regulations

**Available Sizes:**

4W, 6W, 8W, 10W, 12W, 16W, 4TPN & 6TPN.
